Hiring Manager
Cognizant Technology Solutions
Mumbai, India

,

Dear Hiring Manager,

I am writing to express my interest in the Junior Data Analyst position at Cognizant. As a final-year B.Tech student majoring in Mathematics and Computing at M S Ramaiah University of Applied Sciences, I have developed a strong foundation in data analysis, machine learning, and cloud computing. My passion for working with data, coupled with my hands-on experience in various technical projects, drives my enthusiasm for this role.

Throughout my academic and professional journey, I have honed my analytical skills by tackling real-world challenges, such as analyzing and rectifying 20+ software bugs at Tenerci, where I improved system stability and functionality. My experience with AWS SES for managing 100+ automated emails daily, coupled with my technical proficiency in Python, SQL, Power BI, and Excel, has prepared me to work effectively with large datasets and cloud-based tools. My projects, including autonomous drone navigation and SARIMA-based price prediction, demonstrate my ability to apply complex algorithms to derive actionable insights—skills essential for a Junior Data Analyst.

I am particularly excited about the opportunity to join Cognizant because of its reputation for innovation and its focus on data-driven solutions. I am confident that my strong analytical background, combined with my passion for data, will enable me to contribute meaningfully to your team. My future aspirations include advancing my expertise in data science and machine learning, with the goal of driving impactful decisions through data analysis.

Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences align with the needs of your team. I am eager to contribute to Cognizant's success and am available at your convenience for further discussion.

Kind Regards,

Pranav Venkatesh
Applicant
